Demand an independent review of the PEARSON common core NY state exams.

About this petition

WE THE PARENTS AND TAXPAYERS OF NEW YORK demand an independent review of the PEARSON common core NY state exams.

Teacher reports have poured in from both 2014 as well as 2015 on the age inappropriate, erroneous material on these tests. Teachers are concerned and outraged. Children have been highly upset and anxious. This is not an acceptable method of data collection.

1. Lexile levels and math requiring higher level thinking were both grades above the capability and developmental appropriateness of the students. There were numerous correct answers, and too many, too lengthy questions. There were also noted mistakes.
2. In addition to age inappropriateness, and being far too long to be completed in the allotted time, the material was never taught. These tests were not aligned with the curriculum.
3. That our state puts so much weight on unassessed tests, especially in the face of the avalanche of concerns voiced by those who have seen the tests cannot be in the best interests of children.
4. Teachers are instructed not to look at the test. This level of stealth for a child's exam is unprecedented and highly alarming.

All other New York standardized tests are fully transparent, published in full online, with answer keys, EXCEPT FOR THE GRADES 3-8 COMMON CORE PEARSON TESTS.

TRANSPARENT: Grade 4 Science test Grade 8 Science test Grades 3-8 ELA tests, 2006-2010
Grades 3-8 math tests, 2006-2010 Every high school Regent exam

NOT TRANSPARENT: Grades 3-8 Common Core ELA tests, 2011-present Grades 3-8 Common Core math tests, 2011-present.

We have grave concerns that the data being generated with these tests is highly inaccurate and invalid.

We request both full transparency and an end to this secrecy as well as a full investigation completed by a team of educators and child development specialists. We do not want the Regents who have a track record of promoting such tests involved in this audit.

In addition, we are demanding access to independent HumRRO reports regarding Pearson tests.

Please be advised, NYSED was issued a FOIL dated 7/13/14 regarding:

"communications between NYSED and Pearson about the reliability and/or validity of the NY State Exams, and more specifically regarding any reports from 2012, 2013 & 2014 Human Resources

Research Organization or HumRRO together with copies of each of these reports produced by HumRRO"

NYSED acknowledged that a request has been received on 7/21/14 and advised that the FOIL would be granted or denied by 8/18/14, but has failed to grant access as of the date of this writing thereby constructively denying the request.

An appeal was taken in accordance with §89(4)(a) on April 28, 2015 by the party requesting the records (Anna Shah).

We demand that NYSED release the HumRRO reports to the party requesting the records, in accordance with the presumption of access and obligations under the FOIA. "

Comments: As a retired teacher/principal I am all for assessments that are fair and give us information to move a student forward in their education. I am also for an evaluation system that makes sure inky the best are out in front of our students each day. These two goals should not be at the expense of our children because of a poorly designed test and a poorly planned system.

Comments: Pearson is immensely flawed. No proofreading, many mistakes aside from the content being age inappropriate and wending indoctrination material throughout every lesson, paragraph and question. They are completely unAmerican and being the monopoly they are in our Nation, where they have no right, are transforming and destroying all education.

Comments: Our students and teachers are being set up to fail in a major way. This test was not written by education or child development specialists, it was written by big business, whose only concern is profit. Big business has quietly crept into our education system, a place it certainly does not belong. Teachers need to be free to do what they do best...teach. We are giving billions to questionable companies like Pearson to come in and "fix" a problem that cannot be fixed in this way. We need to put these billions directly into our teachers and our classrooms instead. We need to use our education budget for EDUCATION, not to feed corporate greed and crooked politicians.

Comments: At the very least, someone should proofread these tests and all of the curriculum! I have seen so many spelling and grammatical errors that it is often difficult to even understand what the passages are even saying. If we expect our children to write properly the their texts should be accurate and not appear to be written by 5 year olds. The content is inappropriate and way above grade level and the process is long, ridiculous, and seemingly purposfully confusing! We demand better for our children!

Comments: As a NYS taxpayer and a retired teacher, I am extremely upset about the fact that the powers that be do not care that they are destroying education for a generation of students--our future. These tests are vindictive, do not serve any useful purpose except to put money in the hands of Pearson. Good tests evaluate, they don't punish nor make students anxious. Stop the craziness.

Comments: we must have an independent review of the exam as it has been witnessed by teachers who report inappropriate reading levels of the exams and factual errors in the math exams. You then have children believe there is something wrong with them because the exams are so far above grade level for them. It's seems the exam is designed to fail the child.

Comments: We have a flawed educational system right now. Success is based on testing of skills that are developmentally inappropriate. Learning is not about assessment. It is about application of learned skills to daily living. Its about preparation to use skills in life and on the job. These tests do not prove anything. Many many students are not good test takers, but are excellent in their professional field or work environment. What happened to hands on, multi-sensory teaching. I am pro-assessment of skills taught by the teacher, assessed in a way the teacher feels is appropriate. The common core goals are NOT developmentally appropriate. Direct teacher instruction for reading should not begin until a child is developmentally read, and that, for some , is not until age 7 1/2 or 8. Give control back to the teachers. The government needs to stay out of education. If not, I recommend we all home school our children.

979. Name: Amy Mentrasti on 2015-04-28 18:43:08
Comments: Pearson should be investigated. Billionaires should not be at the head of education and curriculum. Math and ELA are not the only important pieces of education and children shouldn't be made to feel incompetent based on a test that's not at their level. It's also a violation of IDEA for students with disabilities.

Comments: Why would the State Ed Dept contract with a company that does not allow teachers to review the exams and students and parents have no information regarding the students achievement on the exam other than a single number?? I am suspicious that there is some political gain for those supporting Pearson. How do we know that what we get from Pearson is accurate information when they submit their final report in August?

Comments: As a practitioner who has worked in the education field for over 20 years, if I had created exams with this many flaws, I would have scrapped them declared them invalid measures for my students and asked a group of professionals to help me analyze what I had done wrong before I ever subjected another group of students to the same errors. That is just good pedagogical practice. Why are we paying these clowns millions of taxpayer dollars for such shoddy workmanship?

Comments: Cuomo says test scores for kids are meaningless? How could that be when there is so much pressure on teachers for them to do well. Even if they don't understand the big picture, kids aren't stupid, kids are intuitive. My fourth graders teacher is the best teacher he's ever had. He has learned more from her than from all his other teachers put together. Unfortunately this will not make him do better on the test, and if 50 percent of her evaluation is based on his 1, 2,3,or 4? It is not meaningless for him or me.

Comments: I do not approve of any child of mine taking a test that will be a measure of their teachers effectiveness. This is a clandestine attempt to insert control and power and restructure our public schools. I want Pearsons hands off the State testing first and foremost. I want the board of regents to be kept out of the decision making process and I demand that this independent review be transparent and available for tax payers to access and share with adequate time to evaluate as shareholders and stakeholders in our public schools and most importantly, our childrens education. Thank you.

1532. Name: Janet Brown on 2015-04-29 16:38:14
Comments: As a dedicated now retired teacher I am shocked at this assault on the concepts of public education, of encouraging independence in students and, as

appropriate, professionals who understand how children grow.

Comments: common core is also in our high schools . It s so much more then new math. It is an evil doctrine and agenda from the government to indoctrinate religion, data mining, rewriting our text books, perverted sex education, written by liberal secular humanistic atheists who have financial investments and want to control the world through new world order.check it out. Follow DAILT testimonies revealing more about Common Core.Google CHOOSE a TOmREFUSE Common CORE
